## **Expected Resources**

### **AP-15 Expected Resources – 91.220(c)(1,2)**

#### Introduction

On March 9, 2023, Congress passed the federal budget for these grants, which allowed the City to have actual entitlement amounts in time for the draft Annual Action Plan budget, which saves considerable time.

#### **Anticipated Resources**

Program	Source	Uses of Funds	Ex	pected Amoun	t Available Yea	r 1	Expected	Narrative Description

HOPWA	public -	Permanent						This year's HOPWA
	federal	housing in						allocation of \$24.1 million is
		facilities						the City's highest in the last
		Permanent						ten years. In 2017, the
		housing						HOPWA federal allocation
		placement						formula changed, and is now
		Short term or						based on a jurisdiction's
		transitional						proportion of people living
		housing						with HIV/AIDS rather than
		facilities						cumulative cases of
		STRMU						HIV/AIDS, and also factors in
		Supportive						the jurisdiction's housing
		services						cost and poverty rate.
		TBRA						HOPWA covers all of LA
								County, which has high rates
								in all of these factors,
								resulting in increased grant
								amounts each year since
								2017. HOPWA service
								providers coordinate with
								other resources to augment
								assistance to clients,
								including the federal Ryan
								White HIV/AIDS Program
								and County public and
			24,017,909	7,60%)7 <b>16</b> 781	Action Plan0	31,627,676	126,510,704	menta§health programs.

								million, and the City
								received around \$30 million
			6,915,586	0	0	6,915,586	27,662,344	over the last five years.

Table 1 - Expected Resources - Priority Table

# Explain how federal funds will leverage those additional resources (private, state and local funds), including a description of how matching requirements will be satisfied

Con Plan grants will be leveraged with a variety of private, state, and local resources for the development and preservation of affordable housing and for the prevention and reduction of homelessness, including:

- New Generation Fund (NGF)/ Supportive Housing Loan Fund (SHLF), a partnership with several banking institutions and private foundations to develop permanent supportive and other affordable housing (private).
- Low Income Housing Tax Credits, Homeless Emergency Assistance Program, No Place Like Home, Infill Infrastructure Grant (state).

Annual Action Plan

• City General Fund, Proposition HHH, Affordable Housing Linkage Fee, LA County Measure H, publicly-owned land (local).

The HOME program normally requires a 25% match, however, due to the large population of impoverished people in Los Angeles, the City's match is reduced by HUD to 12.5%, and the match is met with the private, state and local funding sources stated above.

ESG requires a 100% match, which is met by the expenditure of City General funds for homeless assistance programs.

(See additional content in appendix.)

If appropriate, describe publically owned land or property located within the jurisdiction that may be used to address the needs identified in the plan

**Enhanced Comprehensive Homeless Strategy**: The Comprehensive Homeless Strategy adopted in 2016 included a strategy to Identify Public Land for Homeless Facilities. An updated Enhanced Comprehensive Homeless Strategy was adopted in 2019, and City-owned properties continue to be evaluated and presented to Council as potential sites for homeless facilities under this updated Strategy.

In February 2023, Mayor Karen Bass issued Executive Directive 3, ED 3, authorizing the emergency use of viable City owned property for homelessness interventions. ED 3 directs the Office of the City Administrative Officer to identify vacant, surplus, or underutilized City owned property to be assessed for feasibility for housing or shelter for those experiencing homelessness and directs and authorizes streamlined and expedited permitting and construction for such interventions.

Affordable Housing Development: The Los Angeles Housing Department continues to work with various other City agencies in a coordinated effort for the evaluation, disposition, and development of Cityowned properties for affordable housing. Assets include 63 sites acquired through the dissolution of the former Community Redevelopment Agency, City-owned parking lots, sites acquired through loan default, and other City assets. These City-owned properties are located in various neighborhoods throughout the city, and include permanent supportive, multifamily, mixed-use and homeownership developments. The goals for FY 2023-24 are to finalize six Disposition and Development Agreements for developments that have negotiated affordable housing projects; facilitate the transfer of six City owned sites to the developers through long-term ground leases or sales; enter into Exclusive Negotiation Agreements with developers for six City-owned properties; and issue two Requests for Proposals for affordable housing development, focusing on sites identified under the CAO's Affordable Housing Opportunity Sites initiative and LAHD's real estate owned properties.

**Economic Development**: As part of the City's Jobs and Business Advancement Action Plan, the City Council and Mayor approved the Asset Evaluation Framework, which established a process for evaluating and designating City-owned parcels to be sold or leased for economic development purposes. Local legislation created the Economic Development Trust Fund, EDTF, from the proceeds of those transactions. Up to 50% of the sale or lease proceeds from properties designated for economic development under the Asset Management Framework Policy may be used to encourage property development, business expansion, employment opportunities, economic development projects and programs, development subsidies and business technical assistance in areas with the greatest need.

Currently there are four City-owned or City-optioned sites anticipated to be sold to private developers to build projects that will further economic development goals including job creation, job retention, and additional public benefit components. Proceeds from the sale for City-owned properties are subject to the EDTF while proceeds from City-optioned properties will be utilized to pay the option. The sites are at various stages of development, from preparing the Request For Proposals, Exclusive Negotiating

Agreement negotiations, Disposition and Development Agreement, DDA, negotiations, to DDA performance. Additionally, two single family homes, acquired by the City via loan default, are currently in negotiations to be sold. Proceeds of the sale are subject to the EDTF.

At least three sites are currently under feasibility analysis to establish a potential Enhanced Infrastructure Financing District, EIFD, within the overall jurisdiction. These districts, if approved, would directly fund or pay off bonds that fund economic development investment with tax increment monies gathered.

#### Discussion

For the next five years Los Angeles continues to expand the number of local, state, federal, and private resources it taps into to address the expansive homelessness crisis and the needs of low-income families. Some grants awarded in prior years are still being utilized while the City continues to look for more opportunities to collaborate and leverage with other resources.
