

## Projects

### AP-35 Projects – 91.220(d)

#### Introduction

The City starts the third year of its five-year strategic plan, continuing to implement and strengthen the many projects funded with Con Plan dollars. The City chooses projects that complement its overall strategy of reducing homelessness, increasing the stock of affordable housing, and improving livability. These systems include: The Affordable Housing Managed Pipeline, Aging Services Delivery System, BusinessSource System, FamilySource System, and the Domestic Violence and Human Trafficking system. The City works closely with various nonprofit subrecipients, developers, general contractors, various City departments, local government entities (e.g., the school district), agencies in the County, or State and local financing (e.g., bonds), to implement the various projects. Businesses selected for economic development assistance are vetted through an underwriting process implemented by the Economic and Workforce Development Department.

#### ESG RUSH

	<b>Target Area</b>	
	<b>Goals Supported</b>	Improve Local Economy for Low-Income Residents
	<b>Needs Addressed</b>	Improve low-income communities and livelihoods
	<b>Funding</b>	CDBG: \$3,300,000.00
	<b>Description</b>	The City of Los Angeles owns the 2.1-acre site located at S. Broadway and W. 94th Street, where the proposed development will support and enhance the economic and business environment of Southeast Los Angeles. The project will transform the long-vacant and blighted 9402 S. Broadway site into a vibrant mixed-use development, featuring 28,000 square feet of retail space and 180 residential units, including 27 affordable units for very low-income (VLI) households. Environmental assessments have been conducted and identified contamination with lead, arsenic, and PCE in soil vapor. The first Removal Action Workplan (RAW) was completed with a DTSC ECRG grant, and that work is now complete. While implementing the RAW, testing showed a need to address the VOC contamination residuals in deeper soil in order to ensure the safety of future residents in this new development. CDBG funds will be used to address the VOC contamination.

**Describe the reasons for allocation priorities and any obstacles to addressing underserved needs**

The City of Los Angeles acknowledges the hardships of its residents; as such, it is committed to reducing and preventing homelessness, displacement, and crisis experiences as well as providing opportunities for low-income stakeholders to prosper with living wage jobs, livable neighborhoods, and services that enhance their lives. Projects that directly or mostly address these goals are prioritized.

Geographically, projects that seek to uplift locations with high concentrations of lower income individuals are also granted priority. Areas with high concentrations of homeless individuals, the two federally designated Promise Zones, and the Racially/Ethnically Concentrated Areas of Poverty (R/ECAPs) are all locations that are granted priority, as projects in those areas would offer the most impact for residents with low to moderate income. While not defined the same, there is great overlap of all three types of areas within certain parts of the city.

**ESG RUSH**

The allocation priorities will align with the most urgent needs.

	<b>Funding</b>	CDBG: \$3,300,000.00

	<p><b>Description</b></p>	<p>The City of Los Angeles owns the 2.1-acre site located at S. Broadway and W. 94th Street, where the proposed development will support and enhance the economic and business environment of Southeast Los Angeles. The project will transform the long-vacant and blighted 9402 S. Broadway site into a vibrant mixed-use development, featuring 28,000 square feet of retail space and 180 residential units, including 27 affordable units for very low-income (VLI) households. Environmental assessments have been conducted and identified contamination with lead, arsenic, and PCE in soil vapor. The first Removal Action Workplan (RAW) was completed with a DTSC ECRG grant, and that work is now complete. While implementing the RAW, testing showed a need to address the VOC contamination residuals in deeper soil in order to ensure the safety of future residents in this new development. CDBG funds will be used to address the VOC contamination.</p>

	<b>Goals Supported</b>	Improve Local Economy for Low-Income Residents
	<b>Needs Addressed</b>	Improve low-income communities and livelihoods
	<b>Funding</b>	CDBG: \$3,300,000.00
	<b>Description</b>	<p>The City of Los Angeles owns the 2.1-acre site located at S. Broadway and W. 94th Street, where the proposed development will support and enhance the economic and business environment of Southeast Los Angeles. The project will transform the long-vacant and blighted 9402 S. Broadway site into a vibrant mixed-use development, featuring 28,000 square feet of retail space and 180 residential units, including 27 affordable units for very low-income (VLI) households. Environmental assessments have been conducted and identified contamination with lead, arsenic, and PCE in soil vapor. The first Removal Action Workplan (RAW) was completed with a DTSC ECRG grant, and that work is now complete. While implementing the RAW, testing showed a need to address the VOC contamination residuals in deeper soil in order to ensure the safety of future residents in this new development. CDBG funds will be used to address the VOC contamination.</p>
